Climate Resilient Fisheries & Agriculture: Capacity Building, Gender Equality and Social Inclusion for Sustainable Rural Development

Call for Research Papers

Climate change continues to pose significant challenges to fisheries, agriculture, aquaculture, food security, and rural livelihoods. Building climate-resilient production systems through innovation, sustainable resource management, capacity building, gender equality, and social inclusion is essential for achieving long-term rural development.

To encourage research, innovation, and knowledge sharing, **AQUACONS** invites **Students, Research Scholars, Faculty Members, Academicians, Scientists, Professionals, Consultants, Government Officials, NGOs, Farmer Producer Organizations (FPOs), Cooperatives, Startups, Entrepreneurs, and Industry Experts** to submit **Original Research Papers, Review Articles, Case Studies, Technical Papers, Innovation Papers, Policy Papers, and Success Stories**.

The competition aims to provide a common platform for presenting innovative ideas, practical experiences, and research findings that contribute to sustainable fisheries, climate-smart agriculture, and inclusive rural development.

Objectives

- Promote research and innovation in fisheries and agriculture.
- Encourage scientific writing among students and research scholars.
- Share innovative technologies and successful field practices.
- Support climate-resilient and sustainable rural development.
- Promote gender equality and social inclusion.
- Encourage collaboration among researchers, institutions, professionals, and practitioners.

Suggested Themes

Participants may submit their papers under any one of the following themes:

1. Climate Resilient Fisheries & Aquaculture

Climate adaptation, sustainable aquaculture, fish health management, blue economy, inland and marine fisheries, and aquatic biodiversity conservation.

2. Climate Smart Agriculture & Natural Resource Management

Climate-smart agriculture, natural and organic farming, precision farming, soil health, water conservation, integrated farming systems, and sustainable resource management.

3. Gender Equality, Social Inclusion & Rural Livelihood Development

Women empowerment, youth engagement, Farmer Producer Organizations (FPOs), fisheries cooperatives, entrepreneurship, community participation, and capacity building.

4. Innovation, Digital Technologies & Entrepreneurship

Artificial Intelligence (AI), Internet of Things (IoT), drone technology, aggrotech, fish tech, digital agriculture, value addition, startups, and agribusiness development.

5. Policy, Governance & Sustainable Development

Government schemes, institutional development, food security, climate governance, Sustainable Development Goals (SDGs), and successful development models.
